Detailed Action

Claims Objection

Claims 2 and 6-11 are objected to because of the following informalities:

(1) In claim 2, line 1, "A" should read --The-- since it refers to the one previously cited.

(2) In claim 6, line 6, "counter bearing groove" should read --the counter bearing groove-- since it refers to the one previously cited.

Appropriate correction is required.

Claims Rejection - 35 U.S.C. 112, second paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(1) In claim 6, "the bearing groove" has no clear antecedent basis. It appears claim 4 should depend from claim 3.

(2) In claim 8, "at least zonal small than" does not make sense.

Claims Rejection - 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tachibana et al. (U.S. Patent No. 6,688,005).

Tachibana et al. show a reciprocating power saw (Fig.2) having a housing (2,6), a motor driven reciprocating stroke bar (20) with a tool receptacle (i.e. the blade holder for receiving a saw blade 27, see Fig.2) arranged at a free end of the stroke bar (20), and a bearing means (62) bearing the stroke bar (20) in a tool-side end zone of the housing (2,6) axially displaceable and pivotable, wherein the bearing means (62) has a guide part with a bearing passage (see Figs.2-3) for receiving the stroke bar (20), and wherein the bearing means (62) is mounted in a receiving passage (see Figs.2-3) in the housing

(2,6) by an elastic secondary bearing element (30), and the secondary bearing element (30) is made at least in part of an elastic material (i.e. rubber, see column4 , lines 60-61) as claimed.

Indication of Allowable Subject Matter

1. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
2. Claims 6-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Prior Art Citations

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ritz, Bednar et al. '979 and '941 and Lagaly et al. are cited as art of interest.
